We introduced a few fun and educational titles and have more in our collection of “FUN AND EDUCATIONAL” titles at A 2 Z Press to share. David R Morgan is an educator and award-winning writer who has created many of the delightful titles we want to present this week.

One of the talents of a great educator and writer is to present material to a young reader they find engaging and don't even realize they're learning more than they ever imagined they could!!

*Spiders Love to Snuggle, Wonderful Wiggling Whirling Worms, Ants are fANTastic, and Busy Bees and Willful Wasps,* are educational and entertaining children's stories that are clever - they educate, help with reading skills and are great fun for children of all ages.

Come see the stories!

# Spiders Love to Snuggle

by David R. Morgan

Spiders Love to Snuggle is a great little book to help children be aware of spiders and hopefully learn to not be afraid of them!

Spiders love to snuggle

Let's find some to cuddle...

Arthropods, arachnids they are called,

**Some are hairy,  
some are bald!**

Spiders simply come and go.

# Wonderful Wiggling Whirling Worms

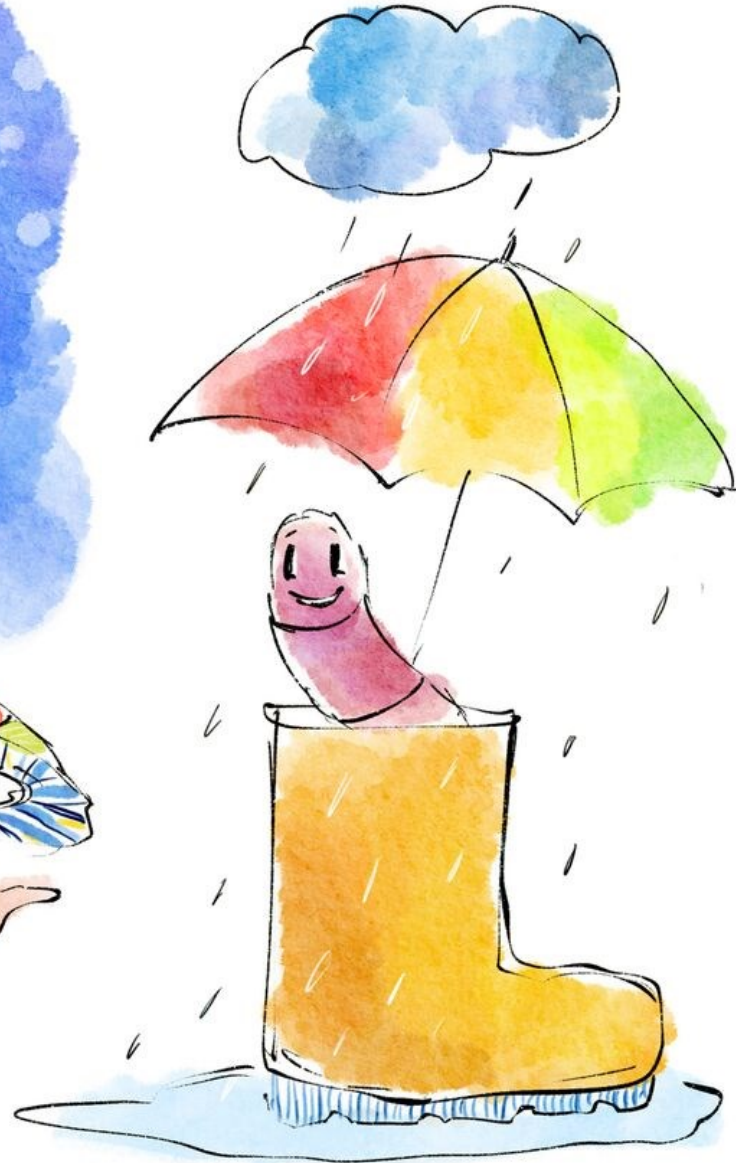

by David R. Morgan

Wonderful Wiggling Whirling Worms is a tremendous read about our valuable worms! It's written in a lovely manner to help children appreciate how important worms are to all of us.

Worms wiggle in  
a whirling  
wonderful way..

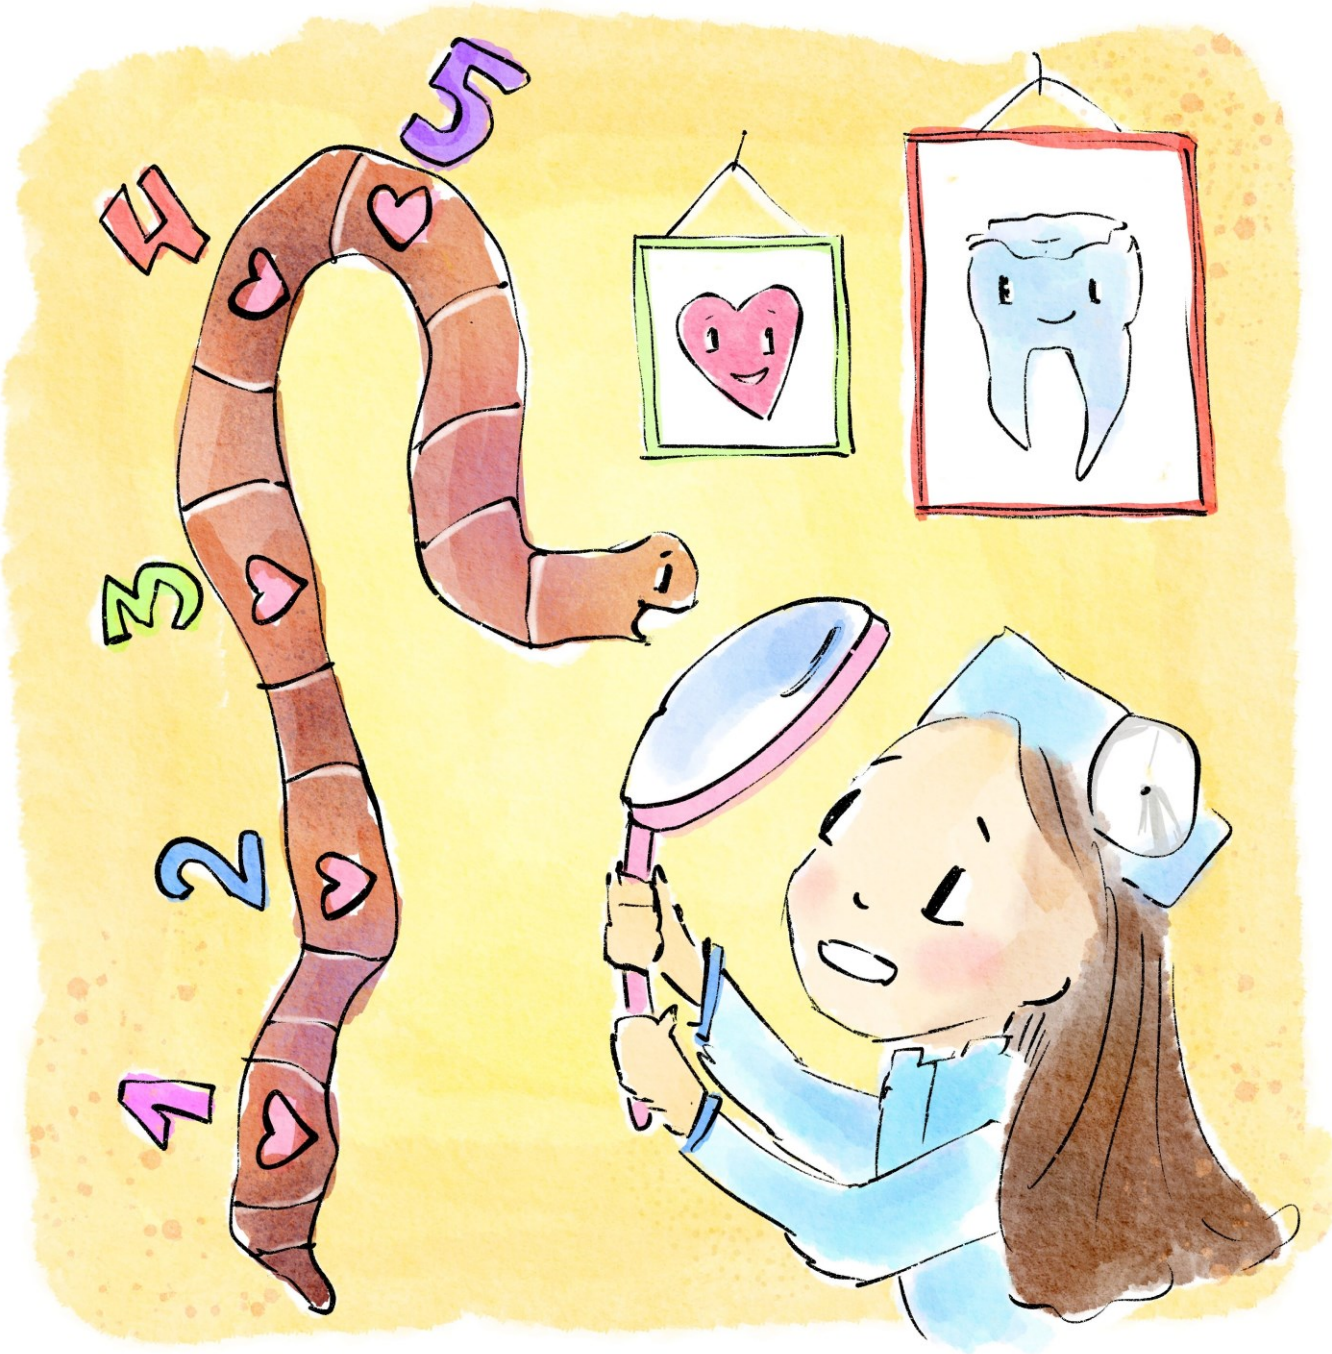

**Night crawlers by night,  
earthworms by day**

Worms use their soft skin  
as lungs to breath...

And worms have 5 hearts  
but they have no teeth...

**Worms have been with  
us since the start....  
Tilling the soil- playing  
a huge part...**

# Ants are fANTastic

by David R. Morgan

Ants may be small, but  
they are MIGHTY and  
they are important!  
Come, see how  
valuable our ants are.

Just stare at your feet,  
bugs are everywhere....

I'll bet you spot  
ants, I'll bet they  
are there....

Lines of crawling  
dots.... black  
green or red

...Six-legged  
critters with  
antenna on their  
head....

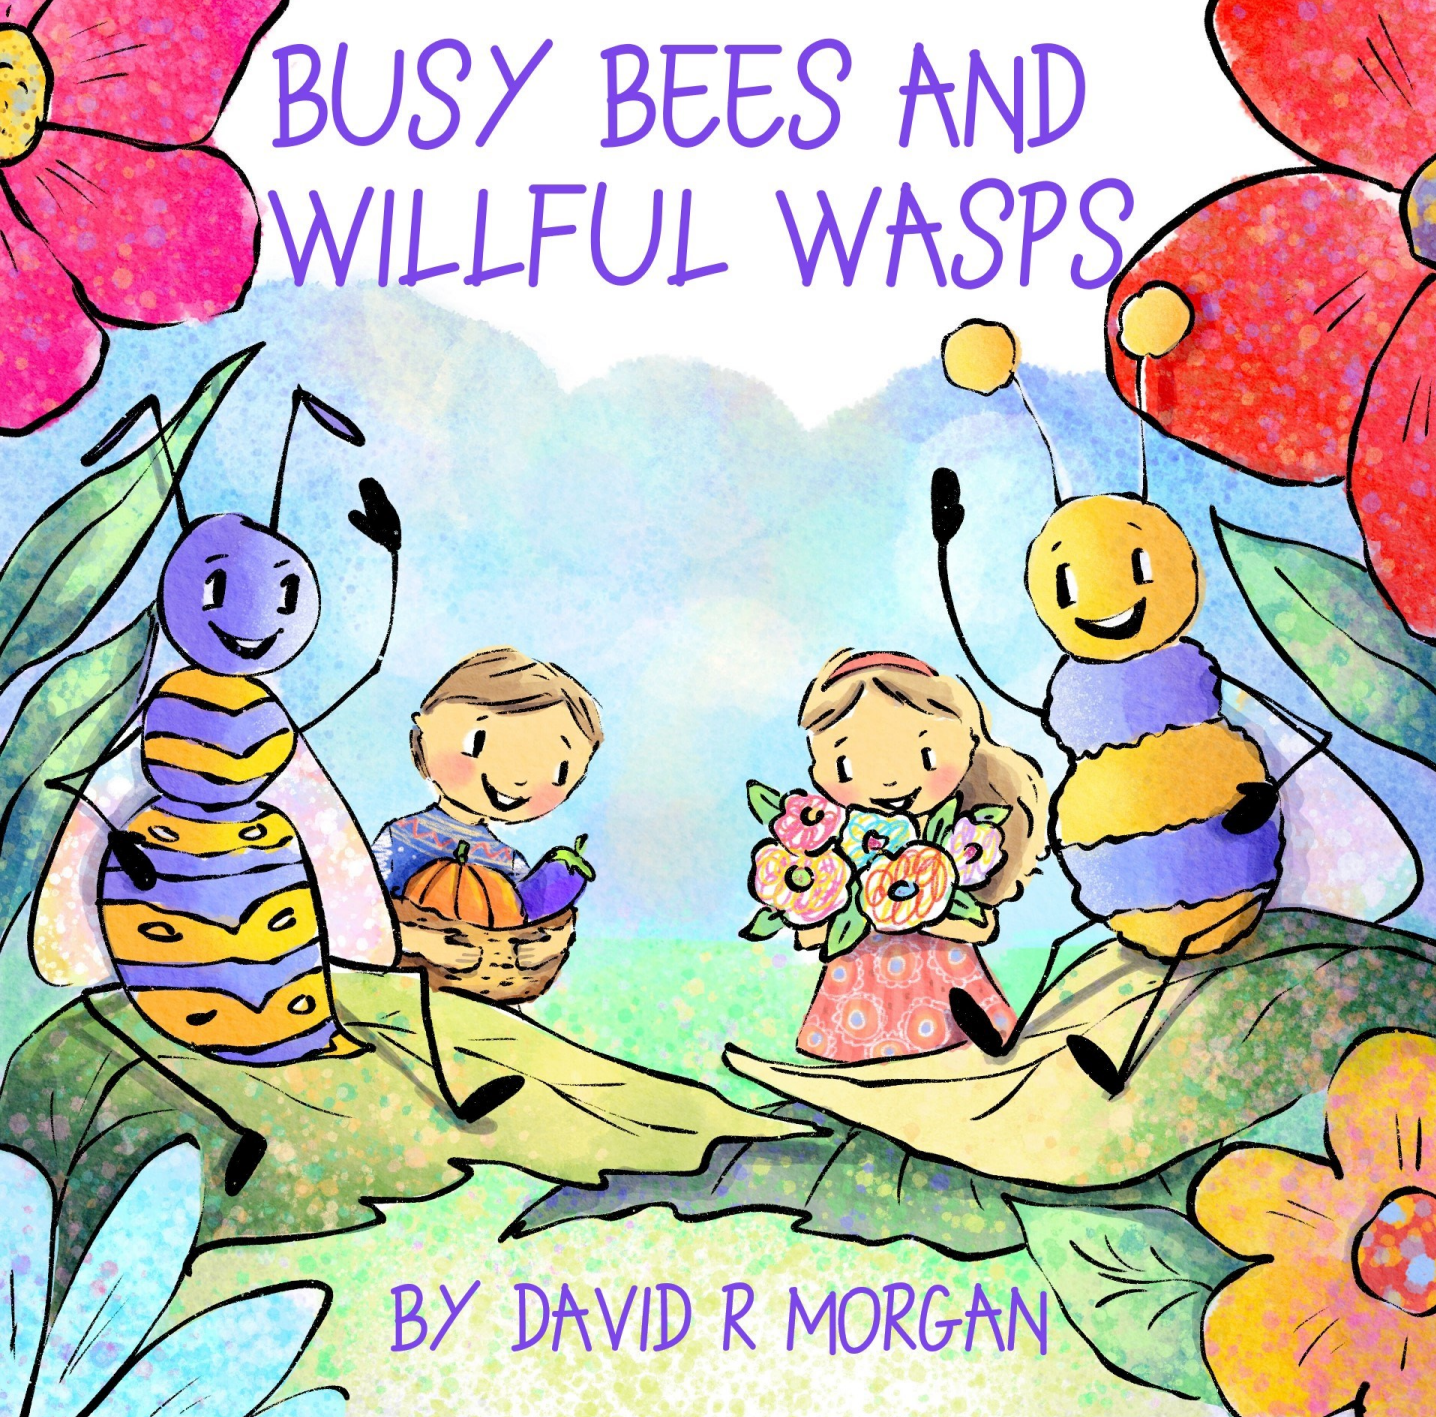

You'll find ants  
in almost every  
single  
country....Just  
NOT at the ice  
poles or under  
the sea1

# BUSY BEES AND WILLFUL WASPS

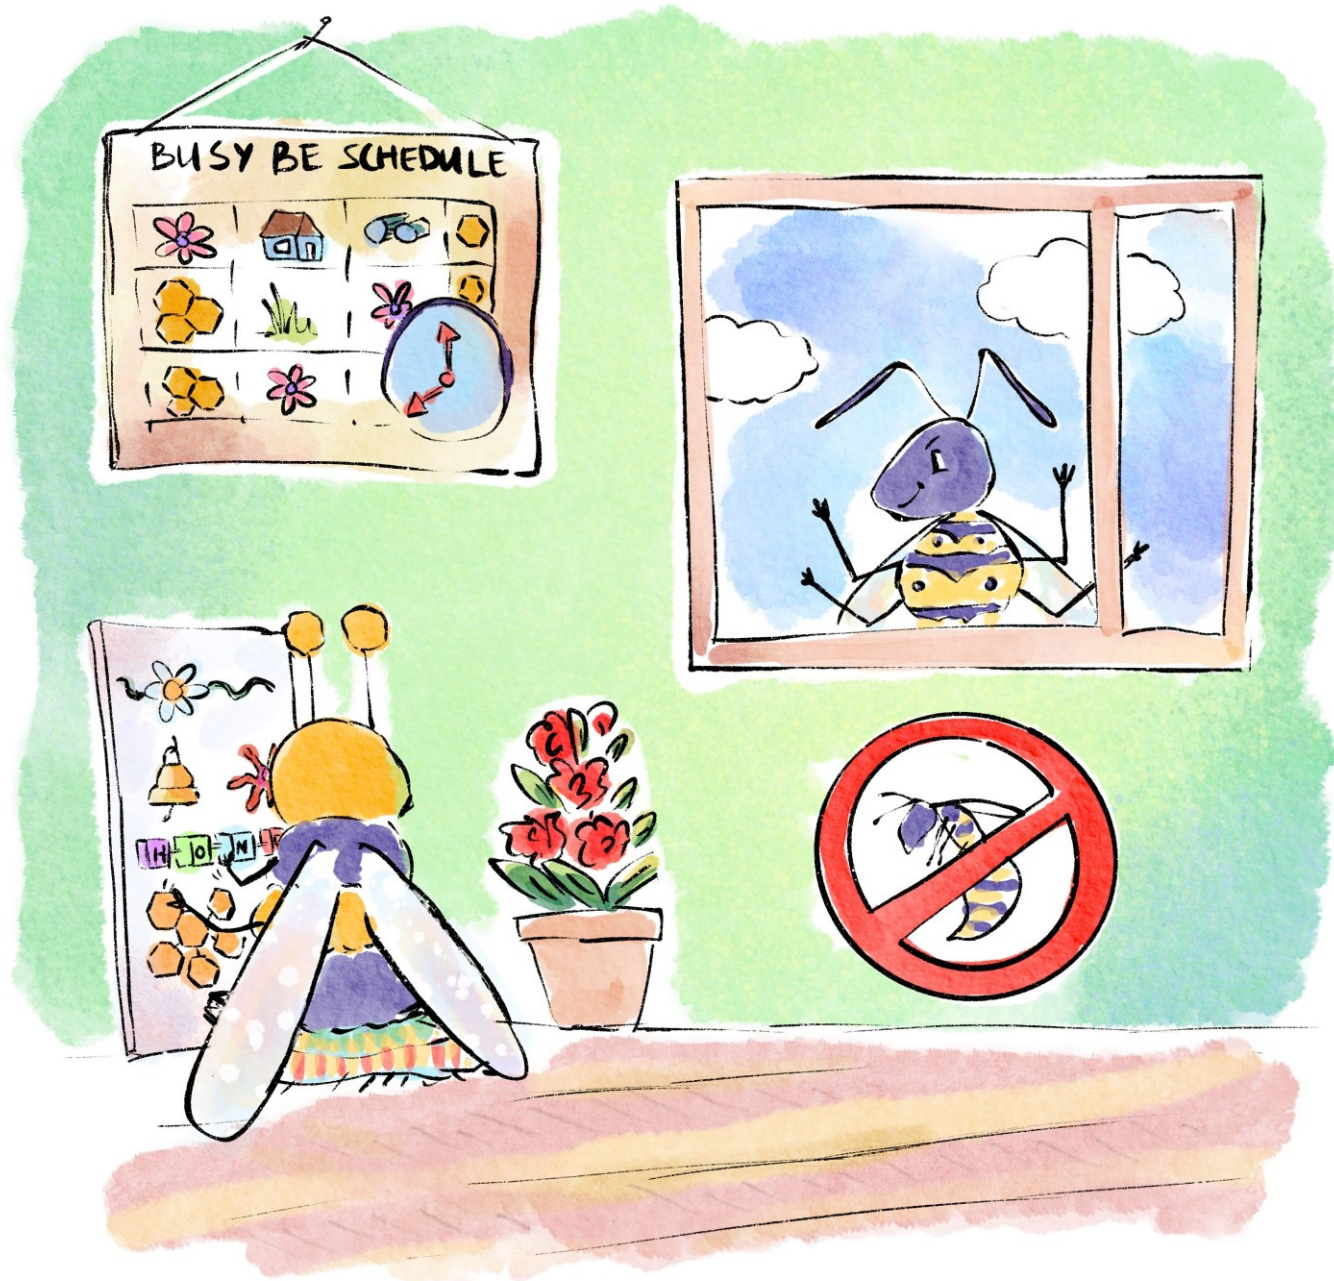

BY DAVID R MORGAN

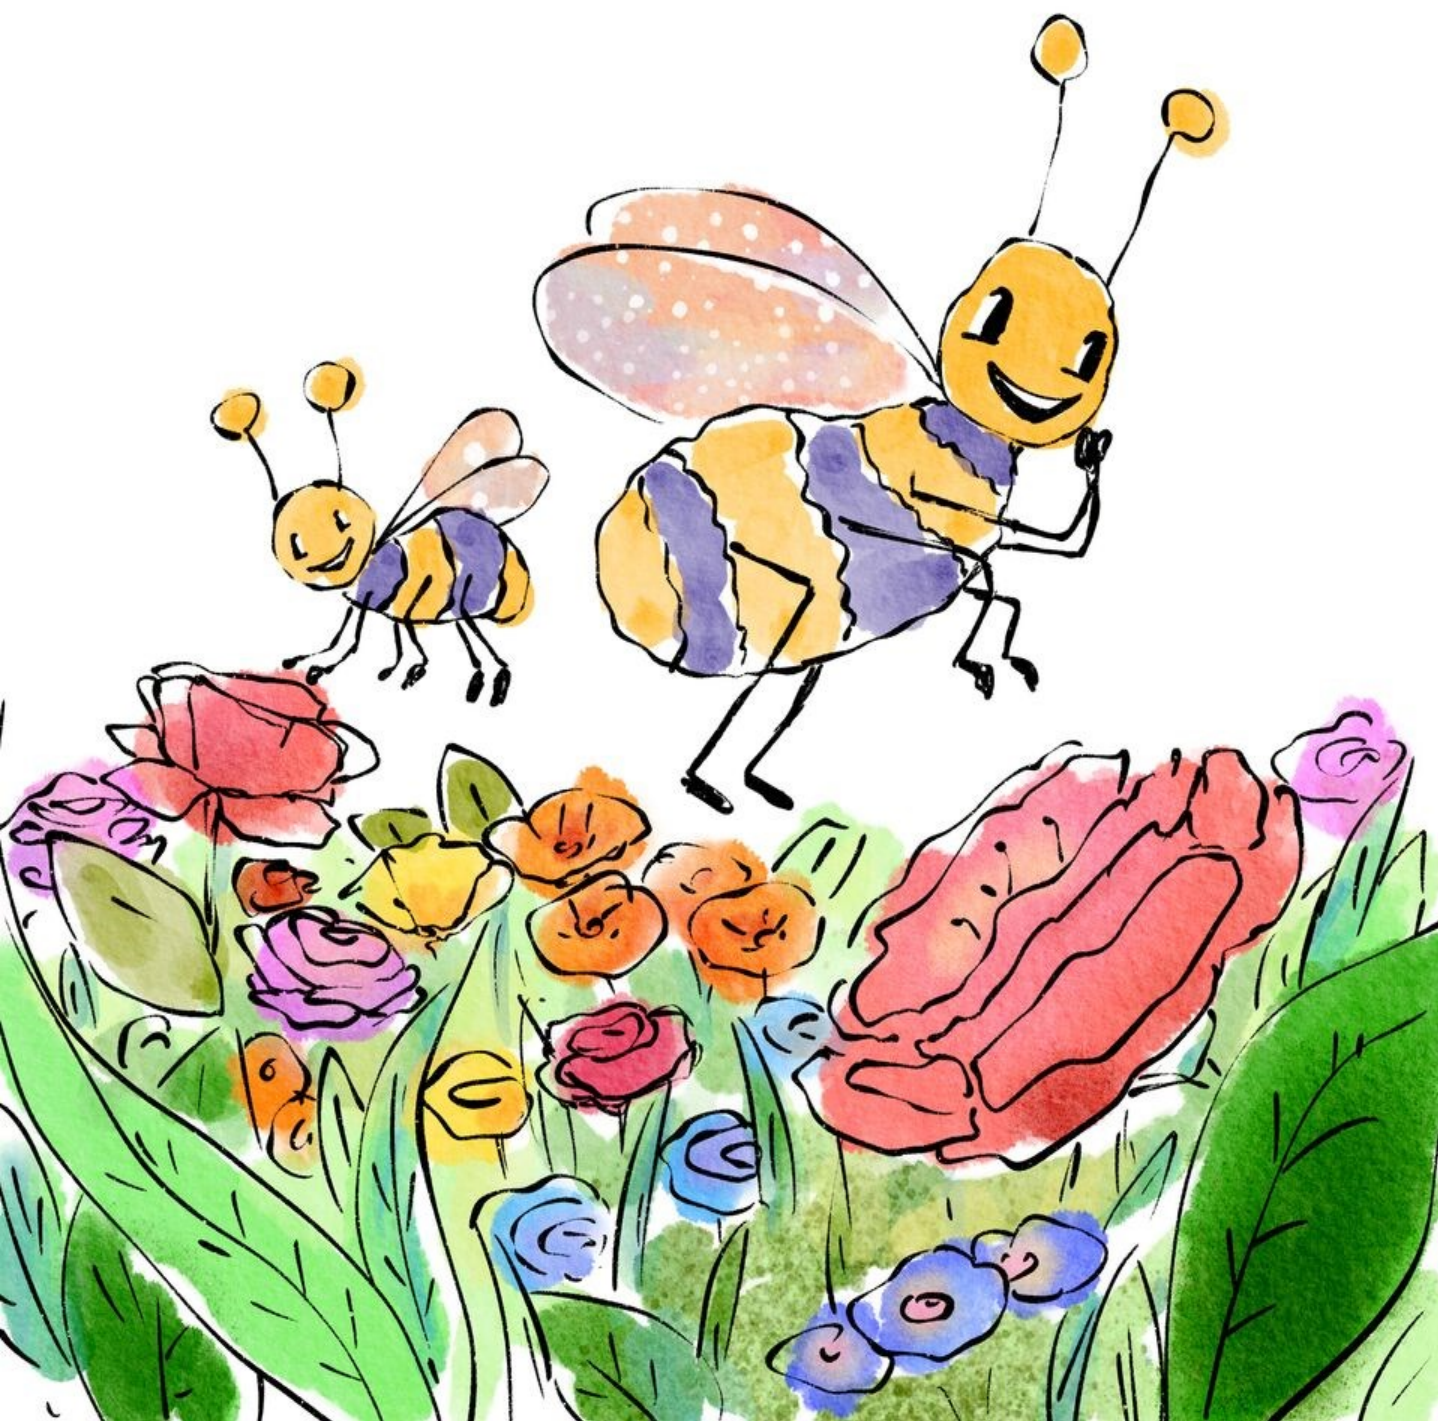

We love honey from  
the honey bee and  
bees are so important  
to our daily lives!  
Wasps, however, are  
to be respected and  
this little book helps  
see why.

Who doesn't like  
the busy bumble  
bee? But willful  
wasps are seldom  
welcome as you  
see!

Bees are happy to  
buzz  
from flower to  
flower,

While wasps just  
get a scowl or a  
cower.

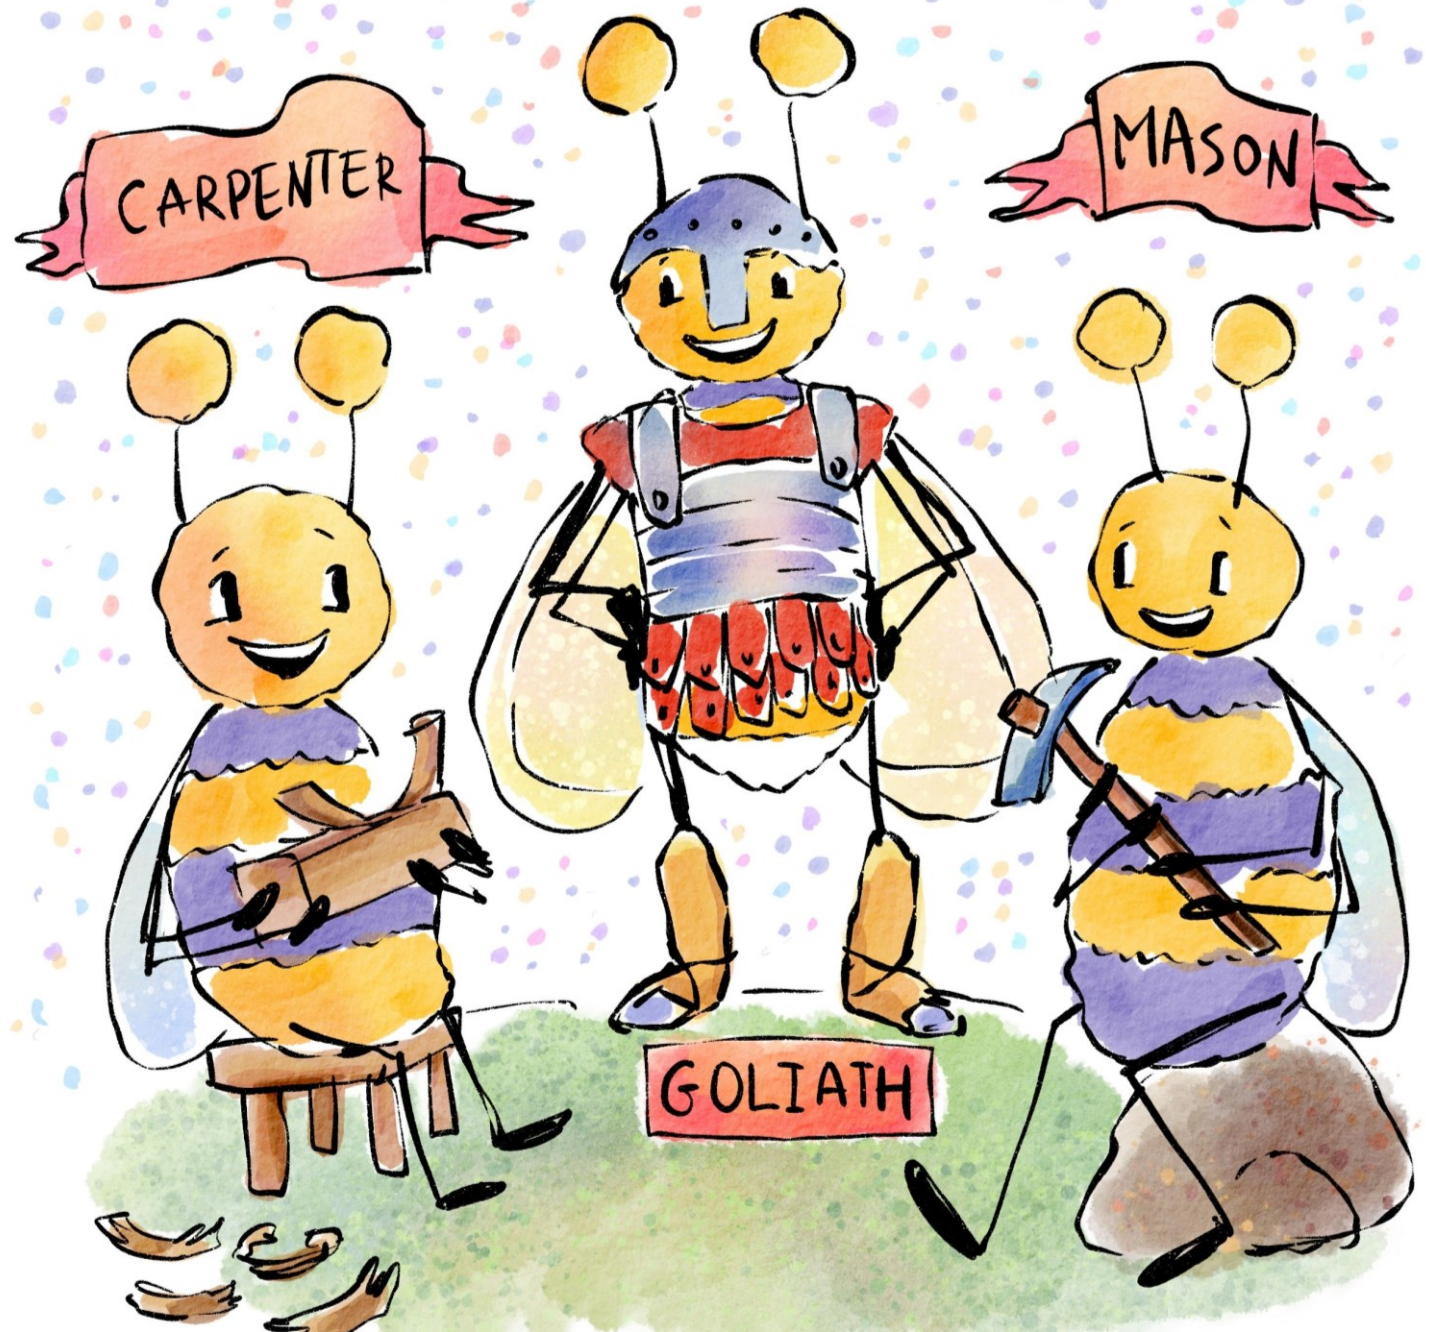

There are so many  
different  
bees to be found,  
But the honey bee  
is the most  
popular bee  
around.

Carpenter and  
Mason bees live all  
alone,  
And Goliath bees  
are the biggest  
bumbles known.

David R Morgan lives in England. He is a talented full-time teacher and award-winning author.

He has written music journalism, poetry and children's books. David has created over fifty children's picture books that are not only filled with colorful and darling illustrations to engage the young reader, each is entertaining and educational as well!
